Performance 1 year in %	+11.62%
Performance 3 years in %	+78.88%
Performance 5 years in %	-
Performance since inception in %	+256.11%

Index/Participation Certificates | Description

Holders of a commodity certificate participate one to one in the performance of the respective underlying instrument, i.e. the commodity. It is generally difficult and expensive to buy commodities directly, and trying to store it is a challenging task.

Commodity certificates reduce the administrative effort to a minimum and offer an economical investment solution in comparison to the purchase of the commodity itself. The price of the commodity certificate rises and falls in proportion to the performance of the underlying. However, investors have to bear in mind the exchange rate aspect for commodity certificates whose underlying are not traded in euro and are not currency-hedged.

Secondary market

From the value date onwards the certificates can be traded on each stock exchange day between 9:00 and 20:00. However, Erste Group Bank AG cannot guarantee the existence or maintenance of an active market throughout the entire life of the certificate. The issuer will, as a rule, continuously quote prices, but is not obligated to do so. Neither is the issuer obligated to redeem the certificates. During the life of the certificate its price will be significantly determined by the general development of interest rates, the fluctuations on the capital market, and the general economic scenario.

Notice on chart (only applicable for future as underlying)

The chart displays the performance of the future currently serving as underlying. The underlying changes monthly or quarterly, as shortly before the future expires there is a roll-over in the next due future. Therefore, the price history in the chart solely represents the current future underlying. Please note the additional information for ISINs AT0000A0CNC5 and AT0000A0CND3 in the product news.
