#### + Advantages

- Early redemption possible
- Fixed earnings of 5.00 % based on the nominal amount on the payment dates, regardless of the performance of the underlying
- Safety buffer against capital losses at the end of maturity

#### ! Risks you should be aware of

- Investors are subject to the risk of the insolvency and thus default of the issuer and may incur capital losses of up to 100%.
- The earnings are capped at 20.00 %, even if the underlying performs better.
- The investor participates in the negative performance of the underlying (including a possible full loss of the capital invested) if the price of said underlying falls below the barrier at the end of maturity.
- The bond price is subject to

fluctuations during the life of the bond, which may result in losses.

### Description

The underlying of this bond is OMV AG (underlying). The bond offers an interest payment of 5.00 % based on the nominal amount on the interest payment dates. The bond comes with a fixed maturity of four years unless it is called prior to the end of maturity. The amount of redemption on the date of maturity depends on the closing price of the underlying on the last observation day (final reference price).

Unless the bond was called early, it will be redeemed at the maturity date as follows:

- a) if the final reference price of the underlying is at or above the final redemption barrier, the bond is redeemed at 100% of nominal value plus the interest payments that have accrued by that point in time;
- b) if the final reference price of the underlying is below the final redemption barrier, the investor receives the number of shares of the underlying as specified by the exchange ratio. Fractional share certificates are not delivered; instead, any fractional amounts are settled in cash.

### Payment notes

This bond offers the chance of an early redemption, depending on the performance of the underlying.

### Settlement

This bond will be redeemed on 02/12/2024, unless the bond was called early.

### Secondary market

The bond will be issued on a continuous basis and publicly offered in Germany and Austria. From the issue date onwards the bond can basically be traded on a stock exchange or over-the-counter. Under normal trading conditions the issuer will continuously quote indicative prices. Listing at the unofficial market of Stuttgarter Wertpapierbörse (Baden-Württembergische Wertpapierbörse) and Wiener Börse is scheduled. The decision about the admission to the respective market and the actual listing will be taken by the board of the respective stock exchanges. From admission onwards the bond can be traded on each stock exchange during trading hours.
