Performance YTD in %	-6.34%
Performance 1 month in %	-4.67%
Performance 6 months in %	-5.83%
Performance 1 year in %	-
Performance 3 years in %	-
Performance 5 years in %	-
Performance since inception in %	-4.61%

subject to the risks outlined in the respective prospectus

Index/Participation Certificates | Description

Holders of an index certificate participate one to one in the performance of the respective underlying instrument, i.e. the index. An index tends to bundle various assets and reflects their performance. This may be assets of one asset class (e.g. shares, bonds, or commodities), one sector (e.g. shares of the automotive or chemical sector), or one country or region (e.g. shares from Germany or Europe). An index is a good indicator of the development of an individual market or of the respective market segment. It is generally not possible to buy an index directly, and trying to replicate it is a challenging task. Also, every purchase or sale of any of the index components would create costs.

Index certificates replicate a portfolio of assets without buying them directly. This reduces the administrative effort to a minimum. Index certificates offer an economical investment solution in comparison to the purchase of the various index components. The price of the index certificate rises and falls in proportion to the performance of the index. However, investors have to bear in mind the exchange rate aspect for index certificates whose components are not traded in euro and are not currency-hedged.

Index certificates facilitate the diversification of the risk since not the entire capital is invested in one single asset. They are suitable for risk-conscious investors who expect the underlying to rise.

Secondary market

From the value date onwards the certificates can be traded on each stock exchange day between 9:00 and 20:00. However, Erste Group Bank AG cannot guarantee the existence or maintenance of an active market throughout the entire life of the certificate. The issuer will, as a rule, continuously quote prices, but is not obligated to do so. Neither is the issuer obligated to redeem the certificates. During the life of the certificate its price will be significantly determined by the general development of interest rates, the fluctuations on the capital market, and the general economic scenario.

Notice on chart (only applicable for future as underlying)

The chart displays the performance of the future currently serving as underlying. The underlying changes monthly or quarterly, as shortly before the future expires there is a roll-over in the next due future. Therefore, the price history in the chart solely represents the current future underlying. Please note the additional information for ISINs AT0000A0CNC5 and AT0000A0CND3 in the product news.
