Reverse convertibles | Description

This protect reverse convertible bond (worst-of) refers to the shares of Microsoft Corporation, Oracle Corporation and Alphabet Inc. Class C (underlyings). The bond has a term of one year (maturity 31/03/2024) and a risk buffer (=barrier; "protect").

Investors receive a fixed coupon of 10.00 % p.a. on the nominal amount upon maturity, regardless of the performance of the underlyings.

The redemption of the nominal amount at maturity depends on the performance of the underlyings:

1. The closing prices of all underlyings are always above the barrier (60.00 % of the strike price) during the observation period, 03/02/2023 (excl.) - 30/01/2024 (incl.). In this case investors receive the nominal amount.
2. At least one underlying is at or below its barrier during the observation period. However, on the valuation date all underlyings are above the strike price. In this case investors receive the nominal amount.
3. The barrier was reached or broken by at least one underlying during the observation period and the closing price of at least one underlying is below the strike price on the valuation date. In this case shares of the underlying which had the worst performance (worst-of) are delivered according to the ratio. Since the underlying is quoted in a different currency than the bond, the strike price is converted into the currency of the bond on the basis of the applicable exchange rate on the valuation date. The bond is thereby currency-hedged ("quanto"). Fractions of a share are settled in cash in EUR.

Secondary market

The bond will be issued on a continuous basis and publicly offered in Germany, Austria, Czech Republic, Romania and Croatia. From the issue date onwards the bond can basically be traded on a stock exchange or over-the-counter. Under normal trading conditions the issuer will continuously quote indicative prices. Listing at Vienna Stock Exchange (official market) and at unofficial market of Stuttgarter Wertpapierbörse (Baden-Württembergische Wertpapierbörse) is scheduled. The decision about the admission to the respective market and the actual listing will be taken by the board of the respective stock exchanges. From admission onwards the bond can be traded on each stock exchange during trading hours.
